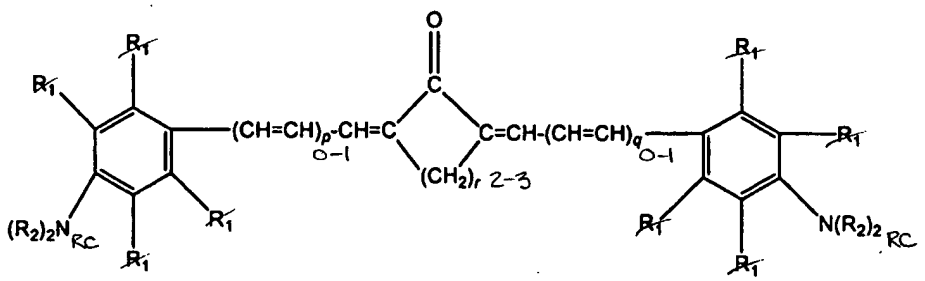
Listing of the Claims

Claim 1 (currently amended) An imaging composition comprising one or more sensitizers and one or more ~~reducing agents~~ quinone compounds and one or more acylesters of triethanolamine in sufficient amounts to affect a color or shade change in the imaging composition upon application of energy at powers of 5mW or less.

Claim 2 (previously presented) The imaging composition of claim 1, further comprising one or more color formers, oxidizing agents, binder polymers, plasticizers, flow agents, chain transfer agents, organic acids, adhesion promoters, rheology modifiers, thickeners, surfactants, an adhesive and diluents.

Claim 3 (original) The imaging composition of claim 1, wherein the one or more sensitizers has a formula:



(I)

where p and q independently are 0 or 1, r is 2 or 3; and R_1 is independently hydrogen, linear or branched (C_1-C_{10})aliphatic, or linear or branched (C_1-C_{10})alkoxy; and R_2 is independently hydrogen, linear or branched (C_1-C_{10})aliphatic, (C_5-C_7)ring, alkaryl, phenyl, linear or branched (C_1-C_{10})hydroxyalkyl, linear or branched hydroxy terminated ether, or the carbons of each R_2 may be taken together to form a 5 to 7 membered ring with the nitrogen, or a 5 to 7 membered ring with the nitrogen and with a second heteroatom chosen from oxygen, sulfur, or a second nitrogen.

Claim 4 (currently amended) An imaging composition comprising one or more cyclopentanone based conjugated photosensitizers and one or more ~~reducing agents~~ quinone compounds and one or more acylesters of triethanolamine, in sufficient amounts to affect a color of shade change in the imaging composition upon application of energy at powers of 5mW or less.
